Original files and handoff log

Use a stable evidence ID. Preserve unchanged originals, and record every copy or transfer separately.

01 Identify and locate the original

Evidence ID

Exact filename or paper document title

Source / acquired from (private)

Received date + time zone

Original stored where? (private protected reference)

SHA-256 hash or hash record ID

02 Copies and transfers

Date + time	From / to (private codes)	File or copy ID + how sent / purpose

03 Original preservation and sharing status

- ☐ Original remains unmodified
- ☐ Metadata treated as private
- ☐ Permission checked before sharing
- ☐ Access is restricted
- ☐ Edited copy has a new ID
- ☐ Original source is still available

Related event, record or photo IDs

Who keeps the original? Private code
