Talking points for a neighbor attending a meeting (DRAFT)

Use only with permission from the resident you represent. A neighbor does not automatically speak on someone else's behalf.

Suggested opening

I am here to ask the County for clear answers about drainage on Tom Street. Dylan Thompson lives at **2265 Tom Street** and has been gathering public records about nearby construction. The concern is whether grading changes and the roadside drainage may affect existing homes.

The saved County records identify construction permits **BP-2026-1621 at 2264 Tom Street** and **BP-2026-1612 at 2268 Tom Street**. Inspector remarks mention proposed pipe and inlet work and keeping the ditch clear. We do not have the approved drawings or measured elevations needed to say what was installed or whether the drainage is adequate.

Five questions to ask

1. Who at County Engineering is responsible, and what is the case number?
2. Where are the original and revised grading and drainage plans for both lots?
3. Does a subdivision grading plan govern them, or was another approval or exemption used?
4. Who maintains the roadside ditch, inlets and pipes, and where is the receiving outlet?
5. Can the County inspect the area and provide written findings and a date for follow-up?

Before leaving, write down the official's name, any case number, the records promised and the expected reply date.

Suggested closing: We are not asking the County to assume a violation occurred. We are asking for the plans, measurements and a clear explanation of how the drainage is supposed to work.

These are draft speaking notes, not independent testimony. Do not display private photos or contact details without permission.
