Letter Regarding Drainage Records and Field Verification

2264 Tom Street and 2268 Tom Street, Navarre, Florida 32566

Date: _____

To: Santa Rosa County Development Services 6051 Old Bagdad Highway, Suite 202, Milton, FL 32583 Email: srcpermits@santarosa.fl.gov

Re: Request for permit documents and drainage verification — BP-2026-1621 and BP-2026-1612 Our parcels: **21-2S-26-0780-0QQ00-1020** (2264 Tom Street) and **21-2S-26-0780-0QQ00-1490** (2268 Tom Street)

Dear Development Services:

I am a resident at 2265 Tom Street, Navarre, Florida 32566, directly adjacent to two lots currently under construction. I am writing to request permit documents and to ask for confirmation of a few factual points. I am not an attorney and I am not making any allegation of wrongdoing. My purpose is simply to understand the approved drainage design for the two neighbouring lots before the houses are completed, and to have the finished drainage checked while the permits are still open.

Current record, as verified from the County's own systems

I have confirmed through the Property Appraiser and the MGO Connect permit portal that Holiday Builders, Inc. is the owner of record of both lots and that two residential permits are active:

- **BP-2026-1621** — 2264 Tom Street, New Single Family (R), Active, issued 23 March 2026, 2,704 sq ft
- **BP-2026-1612** — 2268 Tom Street, New Single Family (R), Active, issued 23 March 2026, 2,312 sq ft

I also note from the portal that both permits currently show the county task "Certified Drainage as Built" as **Assigned**, the mid-construction and final-construction site grading/drainage inspections as **Not Complete**, and "Issue CO" as **Assigned**.

Documents I am requesting

Under section 119.07, Florida Statutes, I respectfully request copies of the following **existing** records, in their original maintained electronic format where those formats are releasable (PDF, CAD/DWG/DXF, GIS, or spreadsheet):

1. The approved residential site plan / plot plan for each permit.
2. The **approved lot grading plan** for each lot, including every revision, with the date and description of each revision.

3. The existing-conditions topographic survey and boundary survey, if any.
4. The erosion and sediment control plan for each site.
5. The driveway plan and culvert details, showing pipe size, material and **invert elevations**.
6. The **sealed engineering letter or certified drainage as-built** when it is submitted, or confirmation of when it is expected.
7. A copy of the County's document index for each permit file, showing every document the County holds — including documents that cannot be released, so that I can understand the full contents of the file.
8. Any code enforcement, stormwater, sediment-control or corrective-action file relating to either lot.

I would also be grateful for the name of the **engineer of record** and the **licensed contractor** for each permit.

Three factual questions

1. Does the County Engineering Department have a **subdivision lot grading plan on file** for either of these lots? Section 4.04.01.D.1 of the Land Development Code turns on this point for lots under one acre.
2. Can the County confirm the **positive outfall and invert elevations** used for each driveway?
3. Is a **field inspection of the completed drainage** scheduled, and may I observe it?

On cost and timing

I understand these requests may involve a fee. Please provide a **cost estimate before incurring substantial charges**, and I would be glad to accept **rolling production** in instalments rather than waiting for a single complete production. If any part of this material is withheld, please identify the **specific statutory basis** for the withholding and release the remainder, as section 119.07(1)(d) and (e) contemplate.

What I am not asserting

To be clear and fair: I am not claiming that any violation has occurred, that the drainage is inadequate, or that anyone has acted improperly. Both permits are active and the open drainage tasks are consistent with normal construction sequence. I am asking for the documents so that the question can be answered on the record rather than by assumption.

I would welcome a walk of the two driveways with the engineer of record once the grading is complete, before the Certificate of Occupancy stage.

Thank you for your time and your assistance. Please let me know if any part of this request needs clarification or if a different form is required.

Respectfully yours,

Name: _____ Address: _____ Telephone: _____ Email: _____

Enclosures available on request: parcel records for both lots; permit record summaries; inspection histories as published in the MGO Connect portal.
